MCK Services, Inc. takes delivery of New VOGELE 5100

MCK Services, Inc.'s Brian Hersh, Mark Hazen and Steve Egger With Their New Voegelé 5100 Paver

MCK Services, Inc. has been a leading grading and paving contractor, serving the Northern California market for over 12 years. Mark Hazen has recently added this new Voegelé 5100 paver to the MCK fleet. This new rubber-tracked machine features an 8' paving width, ideal for city streets and parking lots. The new 5100 achieves laydown rates up to 700 ton per hour powered by a Tier III compliant 140 hp Cummins engine. Electronically controlled separate drive units ensure excellent power transmission, tracking stability and turning radii. Operator efficiency is assured with Voegelé's exclusive ErgoPlus operating system, offering the operator maximum visibility and comfort. The entire material feed and paving process can be monitored at all times from a sitting position thanks to an unobstructed view of the material hopper, outer edges of the screed and the auger tunnel. A large variety of screed options are available.

When you have a paving application, contact Mark Hazen at MCK Services, Inc., (925) 957-9200. But for paving equipment, expert advice and the best products, support and customer service, call the professionals at Nixon-Egli Equipment Company.
